people in motion

reddot winner 2026

Slim—S2, winner of the Red Dot Design Award, one of the most prestigious international design accolades.

Choosing a platform lift
shouldn’t be complicated.

SIMPLIFY.

We help you understand
what really matters.

From homes to public spaces

Our solutions are designed for both private and public settings: homes, apartment buildings, offices, shops, hotels, restaurants and facilities open to the public.

Versatile and reliable, they integrate seamlessly into any environment, ensuring accessibility, comfort and safety every day.

Design that prioritises safety and regulatory compliance, in accordance with the Machinery Regulation EU 2023/1230.

TIERE PIU' BUONO DEL MONDO

Wherever you need them, indoors and outdoors

Our platform lifts can be installed both indoors and outdoors, adapting to the characteristics of the building and the staircase.

A versatile solution that can also overcome space constraints and unique configurations, with maximum freedom of installation.

Slim—S2

Makes every step easier, from the first button you press until you step off

Why choose it?

Extra-low platform (only 4 cm)
Getting on has never been easier.

The most compact on the market
It respects your space and fits perfectly even in the tightest environments.

Streamlined interface
Simple controls, intuitive icons—only what you need.

Minimalist and modern design
Every detail is carefully thought out, because aesthetics are inclusive, too.

Bluetooth APP
Operate the machine directly from your smartphone.

Built-in emergency call feature
If you need help, you're always in touch with someone who can help you.

extrema

The most compact platform lift, now even more accessible

Slim—S2 is the new platform lift for curved staircases from Extrema. Redesigned to truly enhance your daily experience: more compact, more intuitive, more stylish.
Slim—S2 isn't just a platform lift: it's a quiet and discreet ally that makes everyday life easier, with a perfect balance of functionality, comfort and style.

reddot winner 2026

Slim—S2, developed in collaboration with OSMO, has received the prestigious Red Dot Design Award, one of the most prestigious international design accolades.

- The Touch control panel allows for ergonomic travel while on the platform by simply resting your fingers or hand on the illuminated up/down arrows, without needing to apply pressure.
- Extrema provides a two-way communicator as standard, for immediate contact with the outside world in case of need (activated via SIM card, not included).

Slim—S2 accessories

Wireless floor control panel (optional) for calling the platform lift from the landing or returning it to the parking position.

Wireless wanderlead (optional) for use by attendant.

Foldable seat (optional) with safety belt, for use while seated.

Platform dimensions (L×D)	750x600 - 750x650 - 750x700 850x700 - 1000x800 - 1250x800 mm
AM - Folded platform (wall mount)	275 mm
AM - Folded platform (with posts)	310 mm
Speed	0.12 m/s
Soft-start and soft-stop system	standard
Installation environment	indoor and outdoor

Available colours	
Platform	Two-tone metallic aluminium grey (similar to RAL 9007) and RAL 7035
Rails	Metallic aluminium grey (similar to RAL 9007)

Slim

The solution for the most complex staircases, even when space is limited.

Why choose it?

Smart versatility
Slim handles both inward and outward curves, even on particularly narrow staircases, adapting precisely to any environment.

Functional compactness
The slim design, with no drive unit on the platform, makes Slim discreet and quiet—ideal for spaces where every inch counts.

Safety under control
An advanced electronic system constantly monitors operation and simplifies diagnostics, offering a higher level of safety and reliability.

Direct connection to the mains
Slim operates via direct connection to the building's mains power supply.

Versatility and comfort even on complex staircases

Designed to handle even the most complex installations, Slim is the platform lift for curved staircases that combines compactness, versatility and reliability.
The ideal solution for ensuring accessibility and comfort even in tight spaces and on winding staircases.

The special cable-driven system offers significant advantages: Slim can be installed on particularly narrow staircases, with a minimum width of 895 mm, either on the inside or outside of the staircase, even where ceilings are low.

Quiet and smooth, it ensures a comfortable and safe ride.

- The Touch control panel allows for ergonomic travel while on the platform by simply resting your fingers or hand on the illuminated up/down arrows, without needing to apply pressure.
- The emergency button immediately stops the platform and signals unintended operation.
- Extrema provides an emergency call system as standard, for immediate contact with the outside world in case of need (activated via a SIM card, not included).

Slim accessories

Portable remote controls for calling the lift from the landing or sending it back to the parking position.

Wanderlead with spiral cable (optional) for use by attendant.

Foldable seat (optional) with safety belt, for use while seated.

Slim technical specifications

Folded platform with wall mount

Indoor rails *	RAL 9006
Outdoor rails	Hot-dip galvanised
* Other RAL colours available on request	

Logic

Inclined
platform lift
for straight pathways

Why choose it?

Weather-resistant
Anodised aluminium rails and waterproof wiring make Logic perfect for outdoor use, delivering reliable performance in all conditions.

Guaranteed autonomy
The rechargeable battery system allows Logic to operate even during a power outage, ensuring uninterrupted use and complete peace of mind in any situation.

Automated convenience and safety
The platform and safety bars open and close automatically, making use practical, safe and effortless.

Maximum protection during operation
Logic is equipped with advanced safety sensors that lock the platform in place if obstacles are detected along the pathway, ensuring total protection with every movement.

The ideal solution for straight staircases

The Logic straight platform lift ensures independence, safety and comfort when navigating straight staircases, in both public and private settings. Compact, quiet and designed to offer maximum comfort, it enables people with mobility impairments to overcome architectural barriers with ease, even in tight spaces.

The rechargeable batteries enable operation even during power outages, while the motorised platform and safety bars, included as standard, allow for fully automatic opening and closing.

Suitable for both indoor and outdoor installations, Logic is available within a few days thanks to the modular design of the rails.

- The Touch control panel allows for ergonomic travel while on the platform by simply resting your fingers or hand on the illuminated up/down arrows, without needing to apply pressure.
- The emergency button immediately stops the platform and signals unintended operation.
- Electronic system for continuously monitoring the machine's optimal operation.
- Extrema provides an emergency call system as standard, for immediate contact with the outside world in case of need (activated via a SIM card, not included).
