

Homelift

MADE IN ITALY

extrema
people in motion

Living in a multi-storey
home should
always be easy.

SIMPLIFY.

Make the most of your space, every day!

Choosing a homelift shouldn't
be complicated.

We help you understand what really matters.

From homes to public spaces

Our solutions are designed for both residential and public settings, including homes, apartment buildings, offices, shops, hotels, restaurants and other publicly accessible buildings.

Versatile and reliable, they integrate seamlessly into any environment, ensuring accessibility, comfort and safety every day.

Wherever needed, indoors and outdoors

Our home lifts can be installed indoors or outdoors, offering maximum design flexibility.

When installed outdoors, they can provide direct access to balconies, terraces or windows, creating convenient access points and connecting different floor levels.

Sirio—S2

Versatility
takes
shape

Why choose it?

Two technologies in one machine
Hydraulic and electric versions in a single system.

MRL: machine-room-less
For greater design freedom.

Quiet and smooth
Every journey is comfortable and smooth.

Premium components
Only high-quality materials for long-lasting performance.

Direct support from Extrema
No intermediaries, reliable and immediate support.

Simplified installation
Faster installation with less disruption.

The home lift that combines elegance, technology and quiet operation

Sirio—S2 is Extrema's new home lift, designed to blend harmoniously into both residential and public spaces while delivering comfort, safety and style.

Sirio—S2 makes everyday movement more comfortable, combining functionality and design in a single solution.

Safety, built into every detail

Each system incorporates mechanical and electronic safety systems designed in compliance with applicable regulations to ensure reliability and protection.

Dedicated devices monitor and control car movement, door closing, floor levelling and overload conditions

The system also includes emergency lighting, an alarm and a communication system for requesting assistance.

In an emergency, the system allows an emergency call to be made and, using the dedicated battery, enables the car to reach the designated floor.

Design and finishes

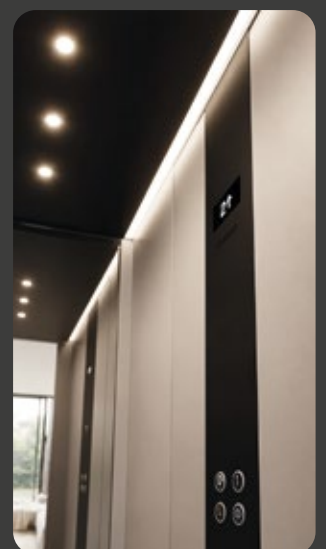

Vertical elegance

Sirio—S2 offers a carefully selected range of finishes, featuring neutral, easy-to-match colours designed to complement a variety of interior styles.

The standard vertical control panel is supplied as standard in matte black, for a discreet and contemporary touch.

The ceiling features LED spotlights and soft lighting. It can match the main colour of the car or provide an elegant contrast in matt black (N3SA), complementing the control panel.

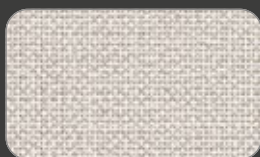

- wall finish in RAL 1013
- matte black vertical control panel in Skinplate N3SA
- matte black ceiling in Skinplate N3SA
- full-width handrail in matte black
- full-glass front wall (optional)
- black carpet floor Penang Anthracite

Design and finishes

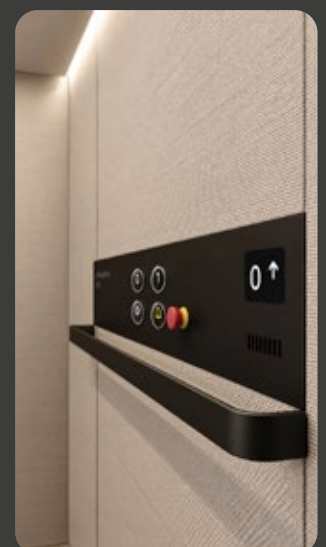

Balance of proportions

The available finishes have been selected to create simple, harmonious combinations, enhancing the car with balanced, versatile finishes

The ceiling with LED spotlights and soft lighting can match the main colour of the car or create an elegant contrast in matte black (N3SA), tying in with the standard horizontal control panel, supplied as standard in the same colour.

- skinplate DT63 wall and ceiling finish
- matte black horizontal control panel in Skinplate N3SA
- full-glass wall (optional)
- anthracite concrete PVC flooring
- 60 cm handrail in matte black, to be combined with the horizontal control panel only

Integrated design

For an even cleaner, more minimalist look, Sirio—S2 is available with a control panel integrated into the car wall, with the controls flush with the surface.

This solution creates a more continuous wall finish and minimises the visual impact of the control panel.

- Skinplate DL8A wall finish
- matte black ceiling in Skinplate N3SA
- control panel integrated into the car walls
- display 5" (optional)
- full-width handrail in matte black
- Pebble Stucco PVC flooring

Swing doors

Steel, blind - Standard

- RAL colour of your choice from the catalogue
- RAL colour not listed in the catalogue (optional)

Sirio—S2 electric drive technical specifications

MRL traction with permanent magnet gearless motor, counterweight and coated ropes.
Designed to provide excellent ride comfort, quiet operation and energy efficiency, without the use of oil.
The technical compartment is fully integrated into the system. The maximum travel is up to 20.5 m.

Gearless - Technical specifications	
Rated load	min. 250 kg – max. 400 kg
Maximum travel	20.5 m
Number of stops	Up to 8
Rated speed	0.15 m/s in Europe; 0.30 m/s outside the EU
Accesses	Single-sided, through-car or side access
Pit	140 mm
Minimum headroom	2760 mm in masonry shaft 2910 mm with metal frame
Operation	Single-phase power supply 230 V, 50/60 Hz Motor power 0.9 kW High-performance gearless motor drive with VVVF
Car interior dimensions	min. 700x700 mm max. width 1400 mm and max. depth 1250 mm subject to a maximum floor area of 1.6 m ²
Applicable standards	Machinery Regulation 2023/1230/EU (EN ISO 12100-1; EN ISO 12100-2; EN 81-41:2025; EN 81-42:2026) Electromagnetic Compatibility (EMC) Directive 2014/30/EU Electrical system compliant with Directive 2014/35/EU

Sirio—S2 hydraulic drive technical specifications

A proven, versatile hydraulic drive suitable for a wide range of configurations, with rated loads of up to 600 kg.
The more compact mechanism within the shaft allows for lower headroom than the gearless version, offering greater flexibility in system design.

Hydraulic - Technical specifications	
Rated load	min. 250 kg – max. 600 kg
Maximum travel	14.5 metres
Number of stops	Up to 8
Rated speed	0.15 m/s in Europe (0.30 m/s available upon request outside the EU)
Accesses	Single-access, through-access, side-access
Pit	140 mm
Minimum headroom	Masonry shaft with internal frame: 2410 mm with swing doors 2510 mm with automatic doors External frame: 2560 mm with swing doors 2660 mm with automatic doors
Operation	Single-phase power supply 230 Vac 50 Hz Motor power 1.5/2.2/3 kW Hydraulic drive
Car dimensions	min. 700x700 mm max. width 2200 mm and max. depth 1250 mm subject to a maximum floor area of 2.4 m ²
Applicable standards	Machinery Regulation 2023/1230/EU (EN ISO 12100-1; EN ISO 12100-2; EN 81-41:2025; EN 81-42:2026) Electromagnetic Compatibility (EMC) Directive 2014/30/EU Electrical system compliant with Directive 2014/35/EU

Where your homelift is made

Behind your homelift is Extrema:
a local **Italian manufacturer** that designs and
manufactures everything in-house—from structural
work to electronics to shipping.

Over 25 years of experience.
More than 30,000 installations
worldwide.
